FUEL SURCHARGE CHART

September 1, 2009 (Updated)

The escalating price of fuel has been well documented in both industry and non-industry publications. Fuel prices are now at record levels and the prospect for further escalation in price is uncertain.

Due to the on-going volatility in fuel prices, it is necessary to revise our fuel surcharge chart to include the higher priced fuels. Consistent with our present practice, the surcharge will be adjusted each Monday according to the Gulf Coast States Price index. You may find this by accessing www.eia.doe.

			LOCAL & LTL	MINI FLOAT 24' BOX TRKS	HOT SHOT TRACTOR	INTERMODAL
\$ 2.06	\$ 2.10		10.50%	12.25%	14.00%	12.50%
